School Website/Social Networking

We like to have photographs on our website/social networking to share our experiences and to give prospective students an idea of how our setting looks and what we do day-to-day. It is, however, of the utmost importance to us to ensure the privacy and safety of students at the school. In general, we try to use pictures of groups of children where faces are not shown, but there may be the occasional photo where not all children are turned away from the camera. We do not name or give other private information about any child. When choosing photographs for the website, the school is mindful of the way children may appear in them and will not include images which are in any way inappropriate.

I give my permission for photographs including my child to be displayed on our website/social networks.

When promoting the school locally (e.g., on Facebook/Instagram or in other local press), we like to use photographs to illustrate how we work in our setting or to describe a particular event. When choosing photographs for this purpose, the school is mindful of the way children may appear in them and will not use images which are in any way inappropriate

I I give my consent for the staff of P.U. Internationale Deutsche Schule Sarajevo – Međunarodna Njemačka Škola Sarajevo to take and use photographs of my child for the purposes described above.

Photographs/Media Handled by Other Parents

Many settings have been faced with the problem of children's photos being uploaded onto social networking sites by other parents. We seek to ensure this does not happen within our school/preschool community.

I understand that if I take photographs/video footage of children on school premises or at a school event, I must not upload these images onto any social networking websites. I will use these images appropriately and keep them private
