Play, learn and grow together!

P.P.U. International Montessori House Sarajevo

ANNUAL PLAN AND PROGRAM OF WORK

IDSS Preschool Group

2025/2026

Sarajevo, july 2025.

Purpose of the Document

The primary purpose of this document is to thoroughly define, structure, and present the annual plan and work program of the German preschool group for the academic year 2025/2026. The document serves not only as a practical framework for day-to-day operations but also as a long-term strategic guideline aimed at creating and maintaining a stimulating, safe, and developmentally appropriate educational environment for preschool children. Its intention is to ensure that the group operates in alignment with the highest contemporary pedagogical, psychological, and educational standards recognized both locally and internationally.

The document encompasses all crucial components of educational work, including the systematic planning of objectives and activities, the careful implementation of teaching and learning practices, and the comprehensive evaluation of outcomes to guarantee effectiveness and continuous improvement. It outlines a structured approach to early childhood education that prioritizes holistic child development and emphasizes the importance of individualized learning paths. Particular attention is given to activities that encourage curiosity, creativity, problem-solving, and critical thinking from an early age, ensuring that children develop the foundational competencies required for lifelong learning.

In preparing this program, special consideration has been devoted to the guidelines, frameworks, and recommendations contained in essential reference documents such as the *Curriculum for Early Childhood Education in Baden-Württemberg*, the *Baden-Württemberg Framework Plan for Early Childhood Education*, and the *Handbuch für die frühkindliche Bildung und Erziehung in Baden-Württemberg*. These authoritative resources are invaluable because they provide evidence-based principles for creating educational content that fosters balanced and sustainable growth across all domains of a child's personality. They highlight the interconnection between cognitive, emotional, social, and physical development, ensuring that the educational process contributes equally to intellectual readiness, emotional resilience, interpersonal cooperation, and physical well-being.

The program has therefore been carefully designed to secure a comprehensive and child-centered approach to learning. This includes the organization of activities around meaningful themes, the application of innovative and research-based methodologies, the thoughtful integration of modern didactic and technological resources, and the establishment of continuous feedback mechanisms for assessing progress. Flexibility and adaptability are central principles: the program is intended to evolve in response to the developmental pace, interests, and individual needs of each child, thereby fostering both academic growth and personal self-confidence.

Educational Context

The German preschool group functions within the broader framework of **P.P.U. International Montessori House Sarajevo**, yet it is distinguished by a pedagogical vision that expands upon and complements the traditional Montessori philosophy. While Montessori principles of independence, freedom within structure, and experiential learning remain integral, the program incorporates additional elements specifically tailored to prepare children for the transition into elementary school. This dual orientation—respecting the individuality of each child while systematically introducing foundational school skills—marks the program as unique in its approach.

A central focus of the curriculum is to cultivate the child's readiness for formal schooling by gradually developing essential academic skills such as early literacy, pre-writing, and numeracy, as well as the ability to understand and apply spatial and temporal concepts. At the same time, equal emphasis is placed on cultivating non-academic dimensions of development, such as concentration, persistence, self-regulation, empathy, and the ability to collaborate effectively with peers. Activities are deliberately designed to nurture autonomy, responsibility, and self-confidence, all of which are indispensable qualities for a smooth and successful transition to elementary school.

An additional distinguishing feature of the program is its close physical and pedagogical connection to **P.U. Internationale Deutsche Schule Sarajevo**. By being housed in the premises of the elementary school, the preschool group enjoys regular and natural contact with primary school students, teachers, and the overall school community. This proximity allows preschoolers to become familiar with the rhythm, routines, and expectations of a school setting in a gradual and non-intimidating manner. They are provided with opportunities to participate in selected school events, observe classroom environments, and interact socially across age groups, thereby gaining a sense of belonging to a larger educational community.

Such integration with the elementary school environment significantly reduces the anxiety often associated with the transition from preschool to formal education. Through daily interactions, children are not only introduced to the academic expectations of school but also learn to navigate its social and emotional dimensions. They experience first-hand the values of respect, cooperation, and intercultural understanding that characterize the school, which further supports their holistic development. In this way, the German preschool group fulfills its dual mission: to respect and nurture the uniqueness of every child while equipping them with the knowledge, skills, and attitudes necessary to thrive in elementary school and beyond.

The Role and Importance of Planning

Planning represents one of the most essential pillars in securing a high-quality and holistic educational experience within the German preschool group. A well-structured plan does not merely outline daily activities, but rather provides a comprehensive framework that guides the entire educational process throughout the year. Careful planning allows educators to define precise developmental and educational goals, ensuring that the learning experiences offered to children are purposeful, meaningful, and developmentally appropriate. By organizing thematic units, selecting age-appropriate pedagogical methods, and aligning activities with the specific interests, talents, and learning styles of children, planning becomes a powerful tool for fostering both academic readiness and social-emotional growth.

Beyond setting goals, strategic planning encompasses ongoing monitoring, systematic evaluation, and reflective practice. These processes allow teachers to track children's progress over time, identify areas where additional support is needed, and introduce timely modifications to the program. In doing so, the preschool remains flexible, responsive, and aligned with each child's unique developmental trajectory. The annual plan and program also function as a guiding document for the entire preschool team, ensuring consistency, transparency, and coherence in the delivery of educational activities. Teachers, assistants, and support staff rely on this shared framework to coordinate their work effectively, avoiding fragmentation and ensuring that every child benefits from a seamless educational journey.

Planning also extends to building strong and meaningful communication with parents. Parents are regarded as crucial partners in the educational process, and the exchange of information between home and preschool ensures that children receive consistent guidance, encouragement, and reinforcement in all environments. Through regular parent-teacher meetings, progress reports, and open dialogue, planning strengthens the bond of trust between families and the institution, creating a supportive triangle of child–parent–teacher. This collaboration not only enriches the child's learning experience but also supports their continuous development beyond the formal setting of the preschool.

Ultimately, effective and forward-thinking planning contributes to establishing a nurturing, stimulating, and well-structured environment where children feel safe, motivated, and inspired to learn. It lays the foundation for exploration, curiosity, and independence, while simultaneously preparing children for a confident and successful transition into primary education.

Organization and Structure

The organizational framework of the German preschool group is deliberately and thoughtfully designed to encourage the holistic and individualized development of every child. The program structure reflects a balanced combination of free play, guided instruction, and child-initiated exploration, which together provide a diverse and well-rounded set of experiences. This balance is fundamental in early childhood education,

as it fosters creativity, independence, problem-solving skills, and social interaction while ensuring that children develop the necessary foundations for academic learning.
At the heart of this structure is a dedicated team of highly qualified and experienced teachers, who bring a wealth of expertise in working with preschool-aged children. Their pedagogical approach reflects modern educational standards, integrating innovative teaching methods with time-tested practices. The teachers skillfully adapt activities to meet the developmental stage, learning style, and interests of each child, thus ensuring that learning remains individualized, engaging, and inclusive. This approach acknowledges that children learn at different paces and that progress is most effective when children are supported in ways that honor their individuality.
The daily routine is carefully organized to offer both structure and flexibility. While the framework provides predictability—essential for building children's sense of security, trust, and routine—it also allows for spontaneous learning moments and creative exploration. This combination nurtures children's autonomy, self-confidence, and curiosity, while also equipping them with early skills in time management and responsibility. Such an environment ensures that children develop not only academic readiness but also social and emotional resilience.

Staff and Their Roles

The strength and success of the German preschool group lies in the commitment and professionalism of its staff, who work collaboratively to create a safe, stimulating, and caring environment for children. The team consists of pedagogues, teachers, and administrative personnel, each with clearly defined responsibilities that together form a coherent system of support for both children and families.
Pedagogues play a central role in designing, coordinating, and implementing the educational program. Their responsibility includes aligning daily activities with the principles of modern preschool education, while also tailoring content to the developmental needs of the group and individual children. They engage in continuous observation and assessment, ensuring that each child is progressing in cognitive, emotional, social, and physical domains. Furthermore, pedagogues take a leading role in fostering strong partnerships with parents, offering guidance, feedback, and support to ensure that the child's learning and development extend seamlessly from the preschool into the home environment.
Teachers provide essential support in the daily execution of activities. Their responsibilities extend beyond instruction to include active participation in play, organization of both structured and unstructured activities, and fostering a positive classroom climate. Teachers help children navigate interpersonal relationships, encourage cooperation, and provide the scaffolding needed for children to build new skills and confidence. They are also responsible for ensuring that children's safety and well-being remain the top priority in every aspect of preschool life.
The administrative staff, while less visible in daily classroom interactions, play a vital supportive role. Their duties include logistical organization, resource management, event coordination, and effective communication with parents and the wider school

community. By ensuring that operations run smoothly and efficiently, administrative staff allow pedagogues and teachers to focus fully on the educational mission. Their work ensures that the preschool group operates in alignment with the overall goals of the school, maintaining both efficiency and quality in all aspects of its functioning.
Together, this multidisciplinary team forms the backbone of the German preschool group, working in harmony to create an enriching environment that nurtures the potential of every child and supports their journey toward lifelong learning.

Equipment and Resources

The German preschool group at IDSS is equipped with an extensive range of carefully selected didactic materials of the highest quality, designed to support and stimulate the holistic development of every child. The learning environment has been thoughtfully organized to provide a safe, stimulating, and inspiring space in which children are encouraged to explore, discover, and learn through play-based activities. The classrooms are furnished with Montessori didactic sets, sensory materials, construction blocks, puzzles, art supplies, and other resources that encourage children to engage in hands-on learning experiences. These materials have been specifically chosen to promote the development of fine and gross motor skills, cognitive abilities, creativity, as well as social and emotional competencies.
Particular emphasis is placed on fostering independence, problem-solving skills, and critical thinking from an early age. Children are encouraged to make choices, take responsibility for their learning, and collaborate with peers in order to build confidence and resilience. This approach not only strengthens their readiness for school but also nurtures the foundations of lifelong learning. In addition to traditional didactic tools, the preschool group is equipped with modern educational technology, including interactive whiteboards, digital tablets, and age-appropriate learning applications. These resources allow for the integration of classical methods of early childhood education with contemporary digital tools, creating a balanced and engaging learning experience.
The learning environment has been organized to include quiet corners for reading and reflection, creative zones for art and music, and open spaces for physical activity and free play. Each area is designed to support different aspects of child development, ensuring that children can explore their interests in a structured yet flexible manner. Special attention is given to supporting early literacy and numeracy skills, as well as creativity through music, role-play, and artistic expression. By combining structured activities with opportunities for spontaneous exploration, the preschool provides a well-rounded educational experience that recognizes the unique developmental needs of each child.
This comprehensive approach ensures that all children are not only adequately supported in their individual learning paths but also equipped with the essential skills, attitudes, and confidence to successfully transition into formal schooling and to pursue further educational achievements.

Work Organization

The academic year 2025/2026 officially begins on **Monday, September 1, 2025**, and concludes on **Friday, August 28, 2026**. The preschool operates **five days a week, Monday through Friday, from 08:00 to 17:00**, ensuring that children receive consistent daily routines that support both structured learning and free exploration.

- **Arrival time:** between 07:30 and 09:00
- **Pick-up time:** no later than 17:00
- **Non-working days:** Saturdays, Sundays, and official school/public holidays

This schedule has been carefully designed to support both children's developmental needs and the organizational requirements of families. The daily rhythm balances educational activities, creative play, outdoor experiences, meals, rest, and individual or small-group work. Through this routine, children acquire a sense of structure and predictability, which contributes to their emotional security and positive social behavior.

Annual Plan and Program for the School Year 2025/2026

The **Annual Work Plan and Program** of the German preschool group provides a detailed overview of the pedagogical goals, teaching strategies, thematic units, special events, and evaluation procedures that will guide the work of educators throughout the school year. The plan reflects the principles of modern early childhood pedagogy, which emphasize active learning, inclusion, and individualized approaches to meet the diverse needs of children. It is designed to offer a solid foundation for future formal education, ensuring that every child is supported in their intellectual, emotional, physical, and social development.

Pedagogical Goals

The pedagogical objectives of the program are centered on the comprehensive development of preschool children, ensuring that their intellectual, emotional, social, and physical potentials are fully nurtured. The curriculum places strong emphasis on building essential skills in language and communication, early mathematics, natural sciences, art, music, and physical education. At the same time, the program highlights the importance of **emotional intelligence**, autonomy, and social integration.
Children are guided to develop self-confidence, the ability to make independent decisions, and the capacity to collaborate effectively with peers. By engaging in cooperative activities such as group projects, role-playing, and shared problem-solving, children learn how to communicate their ideas, resolve conflicts, and appreciate diversity within the group. This creates a strong foundation for inclusion and prepares children for future academic and social challenges.

Educators play a central role as facilitators, guiding children through meaningful experiences that encourage curiosity, experimentation, and reflection. Special focus is also placed on values such as respect, empathy, responsibility, and cultural awareness, which are cultivated through daily interactions and community-based activities.

Thematic Overview and Plan

The thematic structure of the annual program is designed to expose children to a wide variety of knowledge areas and experiences, enriching their understanding of the world around them. Each thematic unit integrates key areas of learning—language, mathematics, science, arts, and physical development—into a coherent framework, ensuring that children acquire knowledge in a holistic and interconnected way.
Themes are explored on a **monthly, weekly, and daily basis**, allowing flexibility to adapt activities to the specific interests, developmental levels, and cultural backgrounds of the children. The approach combines storytelling, art projects, outdoor exploration, role-play, experiments, and collaborative games, ensuring that children learn through **play, discovery, and practical experience**.
Each topic is closely connected to real-life situations—for example, themes such as "My Family and Community," "Seasons and Nature," "Animals Around Us," "Festivals and Traditions," or "Healthy Living"—enabling children to relate new knowledge to their everyday lives. This supports the development of **critical thinking, creativity, and problem-solving skills** while simultaneously nurturing curiosity and imagination.
By combining structured thematic learning with opportunities for free play and spontaneous exploration, the annual plan provides a comprehensive and balanced educational framework that prepares children for the academic and social demands of primary school.

Monthly Thematic Plan

The **monthly thematic plan** provides a structured and detailed framework that guides the educational activities of the preschool group throughout the year. Each month is dedicated to a specific theme, carefully chosen to align with the developmental stage, interests, and needs of the children. These themes are not only educational in nature but are also designed to create meaningful learning experiences that connect theory with practice. Within each thematic unit, educators plan daily and weekly activities that stimulate curiosity, creativity, and critical thinking, while simultaneously promoting social and emotional development.
The plan incorporates a balance of activities across different domains of learning, including language and communication, mathematics and logical reasoning, science and discovery, creativity and art, as well as physical development. Each theme is linked to clear educational goals and objectives, ensuring that children progress gradually in

their knowledge and skills. The activities are designed to be flexible, allowing teachers to adapt them to the pace and abilities of individual children or groups.
Examples of activities include **storytelling, role play, group discussions, small-scale research projects, creative workshops, construction play, and outdoor exploration**. By combining individual tasks with group work, children are encouraged to develop independence as well as teamwork and cooperation skills. In addition, each thematic unit integrates interdisciplinary content, ensuring that children see connections between different fields of knowledge. This holistic approach fosters lifelong learning skills and nurtures an early love of discovery.

Events and Special Activities

Throughout the school year, the German preschool group enriches its program with a wide range of **events, celebrations, and special activities**. These experiences go beyond the regular classroom curriculum and provide children with opportunities to learn through authentic, real-life situations. Such events are essential for introducing children to cultural traditions, community values, and collective celebrations, all of which contribute to their personal and social growth.
Events include **holiday celebrations, cultural festivals, project exhibitions, field trips, visits to museums, libraries, theaters, farms, and other community institutions**. Each activity is carefully planned to support the pedagogical aims of the program, offering opportunities for children to gain new perspectives, expand their knowledge, and develop an appreciation of cultural diversity.
Importantly, these activities are synchronized with the official **school calendar of Internationale Montessori House Sarajevo and Internationale Deutsche Schule Sarajevo**, ensuring that preschool children gradually become accustomed to the practices, values, and routines of the schools they will later attend. This alignment significantly facilitates the transition from preschool to elementary school, as children learn about the rules, values, and expectations of the school community in advance.

The Montessori House
Play, learn and grow together!

Key Calendar Dates for 2025/2026

- **September 1, 2025 – First Day of School**: Introduction to school environment, classroom rules, and daily routines.
- **September 13, 2025 – German Language Day**: Play-based language workshops and interactive activities that strengthen early multilingual learning.
- **November 27, 2025 – Thanksgiving Day**: Activities include collaborative cooking, decoration making, and discussions about gratitude and sharing.
- **December 19, 2025 – Christmas Celebration**: Thematic workshops, preparation of plays, and visits to community Christmas events.
- **December 31, 2025 – New Year's Celebration**: Card-making, decoration workshops, and group festivities.
- **February 9, 2026 – Carnival**: Costume parades, role play, and creative competitions.
- **April 22, 2026 – Earth Day**: Activities focused on environmental awareness, recycling, and sustainability.
- **May 15, 2026 – School Day**: Sports events, collaborative workshops, and art exhibitions of children's projects.
- **June 25, 2026 – Final Ceremony and Graduation**: Performances prepared by children, awarding of diplomas, and closing of the school year.

Through these shared activities, preschool children develop a strong sense of **belonging to the school community**, while also building cultural identity, social confidence, and readiness for formal schooling.

Methodology

The **methodological approach** of the IDSS preschool group is grounded in the principles of **active learning** and child-centered education. Children are not passive recipients of knowledge but active participants who construct their own understanding through exploration, experimentation, and interaction.

Teachers employ a variety of pedagogical strategies, including **direct instruction, guided discovery, project-based learning, play-based activities, and group cooperation**. These methods are complemented by the use of didactic resources that stimulate creativity and inquiry. Activities are always designed to meet the **individual learning needs** of children, allowing them to progress at their own pace while being challenged to reach higher levels of competence.

Particular emphasis is placed on **hands-on learning**, where children explore materials, test hypotheses, and express their ideas creatively. Games, experiments, role play, and storytelling are used as tools to encourage imagination and critical thinking. By combining structured learning with free exploration, educators create an environment that is both academically enriching and emotionally supportive.

Evaluation and Assessment

The **evaluation of children's progress** is continuous, systematic, and multifaceted. Assessment is not limited to academic skills but also includes social, emotional, physical, and creative development. Teachers use **observations, portfolios, children's work samples, developmental checklists, and individual interviews** to build a holistic picture of each child's growth.
Parents are actively involved in this process through **regular meetings, progress reports, and open communication channels**. The aim of evaluation is not to compare children with one another, but to recognize their **unique abilities, learning styles, and personal achievements**. By identifying strengths and areas for improvement, educators can adapt the program to better suit the needs of each child and ensure meaningful progress.

Materials and Resources

The preschool uses **a rich variety of materials and resources** carefully selected to meet the developmental stages of the children. All materials are aligned with pedagogical principles that support learning through play, creativity, and exploration.

- **Didactic Materials**: Puzzles, building blocks, Montessori materials, math and literacy games, science tools, and language learning resources.
- **Creative Materials**: Crayons, paints, fabrics, clay, natural and recycled items for art and crafts.
- **Sports Equipment**: Balls, ropes, hoops, obstacle-course equipment, and props for movement and balance activities.
- **Spatial Resources**: Stimulating classrooms with thematic corners (reading, art, science, drama) and outdoor areas such as gardens and playgrounds, which allow for daily outdoor activity.

These resources provide children with opportunities for **manipulation, experimentation, and creative self-expression**, while also fostering independence, fine motor skills, and environmental awareness.

Educational Goals

The program is designed to support children's **comprehensive development** and prepare them for the transition to primary school. Key goals include:

1. **Language Development** – Building competence in German and English, with additional support in B/H/S when needed.
2. **School Readiness** – Ensuring children are emotionally, socially, and academically prepared for first grade.
3. **Pre-literacy and Numeracy Skills** – Introducing children to letters, sounds, and numbers through play-based activities.

4. **Spatial and Motor Skills** – Strengthening physical coordination, balance, and orientation through daily physical activities.
5. **Concentration and Individual Strengths** – Developing focus, perseverance, and self-confidence while nurturing each child's talents.

Through this comprehensive program, children gain the knowledge, skills, and attitudes necessary to thrive in their future education and beyond.
